All-In-One Web System

What's The Problem?

For many churches, having a web site is an elusive target – it's something they know they should have, but getting there often requires either finance or skills which are simply not available. A custom designed web site can be a real asset, but this can place a large financial burden on smaller churches. Also, the technical nature of running a site often ends up meaning that the site being run by an enthusiast within the church, but problems can then arise when that person leaves the church or loses the initial sense of excitement about the project.

What's In The Package?

feed:the:mouse is offering the All-In-One Web System as an alternative to expensive custom sites – you can choose a design for your site from a number of options, and without needing to purchase any additional software, you are able to edit the content of your pages, add new pages and delete pages that are no longer needed. It's just like using a word processor, but with the All-In-One Web System, now you're running your own web site!

Also included in the All-In-One Web System are:

- Premium web hosting – this is the space you need for others to be able to get to your web site.
- E-mail services – you can set up an unlimited number of e-mail addresses at your church domain e.g. office@mychurch.org.uk
- Domain name – as part of the package, you get your own domain name included. Alternatively, if you already have a domain name, you can transfer that to us and we will cover the cost of future renewals for you.

Get Value For Money For Your Church!

Typically, a custom designed web site for your church could cost around £1,000. The All-In-One Web System offers you the chance to get up and running for far less than that!

The system costs just £400 for you to get up and running. On top of this you just have hosting costs, which you will, of course, have with any web site. This currently costs £124.99 per year.

So, your first year will cost $£400 + 124.99 = £524.99$, and each year after will cost £124.99.

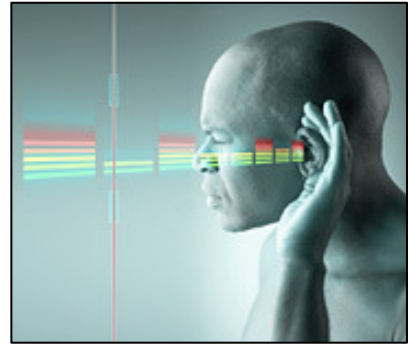

The fees cover use of the administration system allowing you to edit and add your own pages, as well as ongoing hosting, e-mail services and domain name. There's nothing more that you need to pay to have an effective and professional web site!

Options

If you want something extra, we have a number of options which can help you make even more of your web site:

- Discussion forum – this allows visitors and members of your church to bring your site to life by adding their own thoughts and conversations. You can use this to get feedback, to discuss theological questions, or anything else that's relevant to you and your church! Cost: £50 set-up, then £5 per month
- Streaming media – if you are planning to put audio or video files on your web site e.g. sermons, introductory videos etc, we recommend that you go for the streaming media option. This uses advanced software on our server to give the best presentation of audio and video files to your visitors, regardless of their connection speed. This is a premium option, and is a great way to effectively show what kind of church you are. Cost: £75 set-up, then £15 per month including 2GB extra of monthly transfer (see the technical details section below for more information)
- Change to a new template – if you decide you'd like to give your site a fresh look, we can change it to use one of our other designs – the list is growing all the time! Cost: £50 set-up charge; no change to the monthly fee.

We're developing new options all the time, and if there's anything you'd like to see, please do get in touch with your ideas! We are planning options such as e-commerce (to allow you to sell online), calendars, photo galleries and more.

Contact

To get in touch with us at feed:the:mouse, you can use any of the following:

- E-mail: office@feedthemouse.com
- Tel: 0161 688 0818 / 07886 301705
- Address: feed:the:mouse, 210 Oldham Road, Failsworth, Manchester M35 0HH

Technical Details

For those with more technical questions, you will hopefully find some of the answers here, but please do get in touch if you would like to ask anything else.

Hosting features and allowances

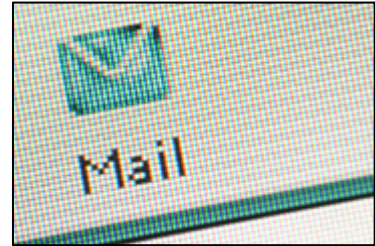

We use one of the best hosting companies in the country for this service so you get the benefits of reliability, performance and security. This hosting uses a Microsoft platform with all the benefits of being on an industry standard operating system. Your hosting space can run ASP, ASP.NET, PHP and CGI scripts, and can host Access databases. SQL Server is also available as an option.

Your hosting package includes a monthly 2GB data transfer allowance (or extra, if you subscribe to the Streaming Media option) – very few church web sites would be expected to exceed this limit. Each GB over this allowance is charged at £3 per GB (this is always rounded up to the next whole GB, so using 2.1GB in a month would be rounded up to 3GB, and would incur a £3 charge).

Email services

You can set up unlimited e-mail addresses for your domain as forwarders (these simply send e-mails on to an e-mail address that you already have, such as your Hotmail account), or you can set up POP3 accounts, from which you can download your messages using Outlook, Outlook Express or similar.

Domain transfer details

There is no fee for transferring your existing domain to be under feed:the:mouse's control; this is covered as part of the set-up fee for the package. If at any stage you would like to transfer your domain out of our control, you are free to do this – you will never incur a charge from us.

Streaming media explanation

Our servers use Windows Server 2003, which comes with Media Services as an optional feature. If you wish to use the Streaming Media option on your package, we will configure Media Services to stream content from a folder on your site to your visitors. In time, we plan to offer the ability to stream other types of media e.g. Quicktime, RealMedia etc.

Selecting the Streaming Media option will raise your monthly hosting data transfer allowance by another 5GB. Again, any excesses will be charged separately. If you expect to be regularly exceeding these allowances, a separate price can be negotiated with a higher allowance.
